## Overview:

The Pertronic In-Ceiling Detector Mount Kit and Detector Mount Pole together provide a convenient method to allow detector coverage in an above-ceiling location where the mandatory access to the detector would be otherwise difficult. The kit has 4 main parts, The Cover Plate, Pole Base, Ceiling Bracket and Detector Mounting Bracket. One or more 1m poles are required depending on the installation requirement.

A universal detector base bracket allows the user to mount a base from most detector manufacturers. Either conventional or analogue detectors may be used with their respective detector bases.

A Remote Indicator is available to provide visual alarm indication for a concealed detector at the ceiling.

## Features:

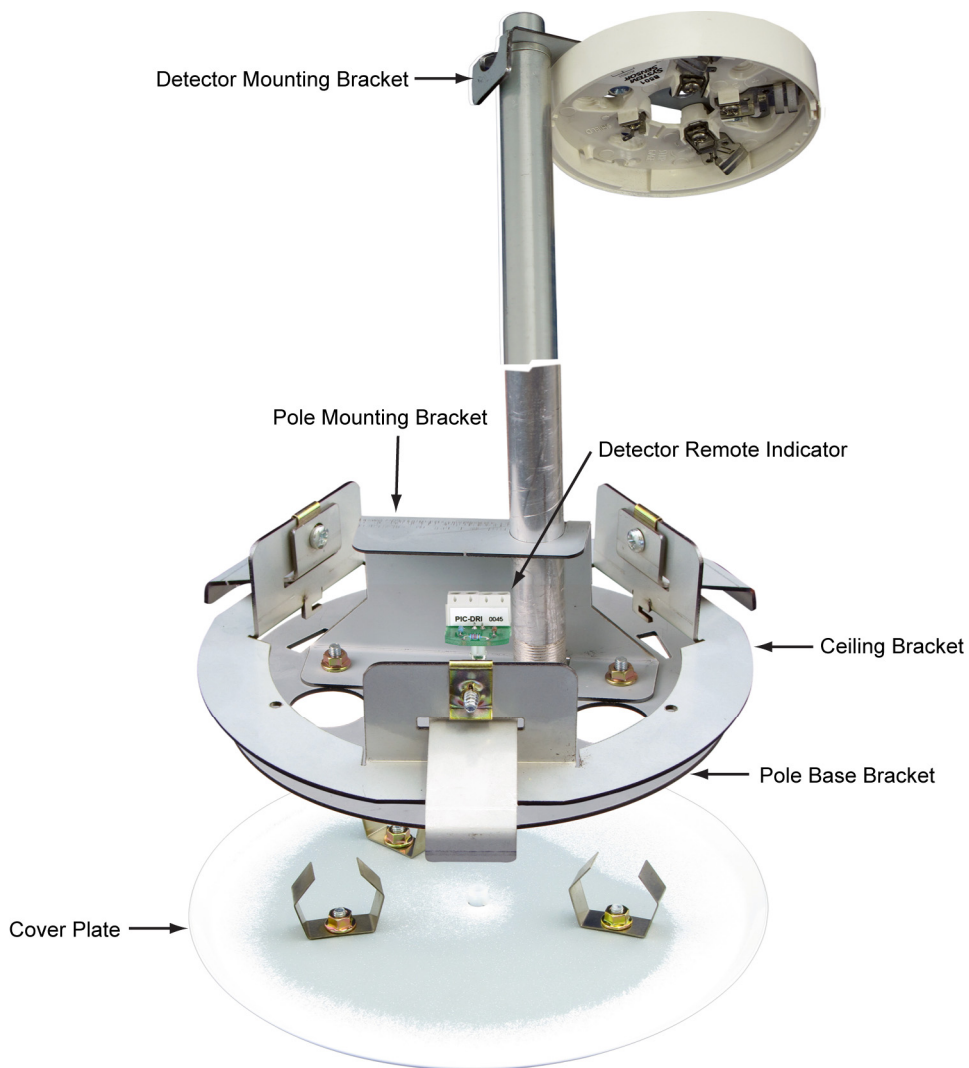

- ▶ Allows detector mounting height up to 3 metres
- ▶ 1 metre poles available separately
- ▶ Universal detector mount bracket compatible with analogue or conventional detector bases
- ▶ Optional remote indicator mounts to pole base fitting
- ▶ Pole base fitting locks tightly into ceiling bracket
- ▶ Spring clips allow cover plate to easily snap to pole base
- ▶ Choice of labels supplied:
  - ▶ FIRE ALARM label for use with a remote indicator
  - ▶ FIRE DETECTOR label for use if a remote indicator is not used

## Specification:

Mechanical:	Cover Plate Diameter	Ceiling Aperture	Detector Mount Pole Length	Weight
	183mm	145- 155mm	1 metre	Detector Mount Pole: 20gms In-Ceiling Detector Mount Kit: 1.1Kg
