Product Overview

Red, blue and amber lenses for wall-mount **SpectrAlert Advance™** strobes open up new possibilities for visual warning systems. On a staged evacuation system, an amber strobe can be used for the “Alert” signal, meaning: “Get ready to evacuate”. A white or red strobe means “Evacuate Now!”

A blue strobe stands out from the red beacons on fire trucks and emergency vehicles. In the Auckland region, blue strobes are sometimes used for highlighting fire-fighter mimic panel locations.

Coloured lenses may be used to convert any wall-mount **SpectrAlert Advance™** strobe from white to a coloured strobe light. Coloured strobes may be used as warning devices for Emergency Communication Systems (ECS) or Mass Notification Systems (MNS).

Coloured lenses have a self-adhesive flange with a peel-off protective liner for quick, easy installation.

Coloured Lenses for wall-mount SpectrAlert Advance™ Strobes

Features:

- ▶ Lenses fit all wall-mount **SpectrAlert Advance™** strobes and horn strobes including SR, SRK, P2W-P and P4R
- ▶ Easily adapt any wall-mount **SpectrAlert Advance™** strobe for ECS/MNS events such as severe weather, toxic gases, or sprinkler activation
- ▶ Outdoor rated from -37 °C to 66 °C
- ▶ Lenses available in Amber, Blue and Red
