## Product Overview:

- The **PSSB501** is one of a range of 100V Line speakers (1.1W max) manufactured by Pertronic Industries Ltd.
- Integrates a 1W speaker; tapped line transformer and DC blocking capacitor mounted in an aesthetically pleasing acoustic enclosure, which includes a System Sensor B501 Analogue Addressable detector base.
- Used in conjunction with the Pertronic 20W or 50W, 100V line amplifiers, it provides a cost effective solution for speaker-based building evacuation systems that must comply with the NZS4512: 2003 and AS2220 Standards.
- The **PSSB501** has mini-jumpers for selecting one of 0.2W, 0.7W, or 1.1W power outputs.
- At 1.1W the **PSSB501** can reproduce the 'Evacuation' tone at a sound pressure level of 98dBa at 1 metre, when used with Pertronic 100V amplifiers.

## Operation:

- The panel loop output and amplifier line output are connected to the **PSSB501** Speaker as shown in Figure 1.
- Terminals are provided for both analogue loop and 100V line connections.
- The Loop '+' and '-' terminals are connected to the corresponding **PSSB501** Loop '+' and '-' terminals.
- Similarly, the amplifier's line terminals '+' and '-' are connected to the corresponding **PSSB501** Line '+' and '-' terminals.
- If the amplifier is not active, the 100V line is monitored by the application of an inverted DC voltage to the **PSSB501** Line '+' terminal.
- The **PSSB501** consumes no power in monitor mode.
- A 10kΩ, 1W monitor resistor is placed at the last **PSSB501**.
- When the Amplifier is active, the monitoring DC voltage is removed from the line output and the 100Vrms signal is applied, causing the **PSSB501** to operate.

## Specification:

<b>Dimensions:</b>	When recessed:	
	Height below ceiling	31mm (including B501 base)
	Height above ceiling	35mm
	With surface mount extension cover	66mm
	Diameter of mounting flange	122mm

**Colour:** White.

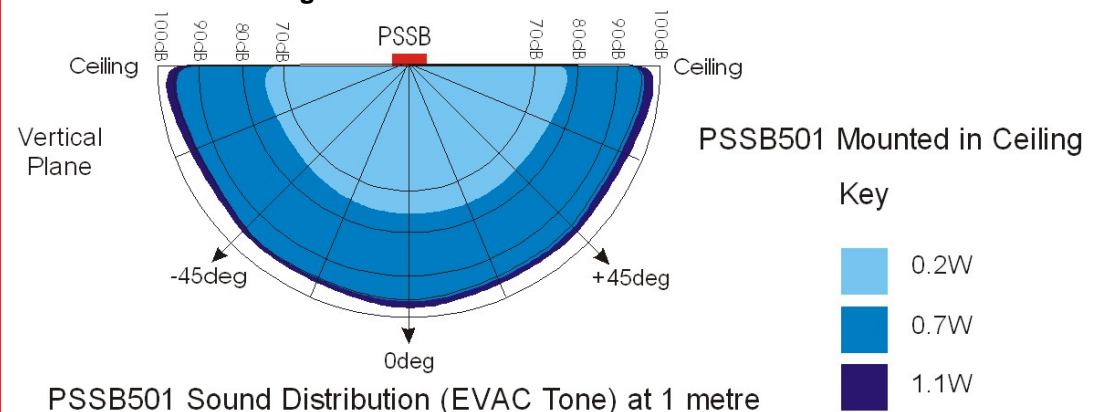

<b>Sound Level Output:</b>	Sound pressure level at 1.1W, 1m (peak ± 3dB)			
	Power Tap Selected:	0.2W	0.7W	1.1W
	Evacuation:	77.8dBa	98.7dBa	98.9dBa
	Alert:	64dBa	83.5dBa	85.3dBa

**Frequency Response:** 400Hz – 10Khz

**Input Capacitor:** 2µF, 63V Ceramic Disc

**Maximum Line Voltage:** 100Vrms

## Sound Distribution Diagram:

**Connection Diagram:**

**Figure 1**

**PSSB Drilling Template:**
